### HARD WATERS DISH WASHING MACHINE DETERGENT WINS 012

**PROPERTIES:** Special liquid detergent for cleaning of crockery and having a superior degreasing, sequestering and dispersing power. Prevents the formation of lime precipitates. Easily removes the most stubborn grease and dirt. Specially formulated for working in hard waters (> 30°F). Suitable working temperature is 55-60°C.

**DILUTION:** Manual or automatic dosing. In automatic dishwashing machines with regulator, use a dose of 3g per litre of water. In machines without a regulator, 60 ml dose for normal washing, increasing the dose for utensils with solid grease.
